Education

Jiangsu University of Science and Technology	2015.09 - 2019.06
Bachelor of Engineering	Zhenjiang
Major: Heating, Ventilation, and Air Conditioning (HVAC)	

Work Experience

BIM Engineer	2019.07 - Present
China Construction Eighth Engineering Bureau	
- Led the deepening of prefabricated mechanical rooms for the Chengdu SKP project, including piping system design and pump module development. Collaborated with factories and supervised on-site construction, turning the chiller room into a project highlight. - Handled MEP BIM tasks for Shenzhen Hongfan Building, Ningyang Central Hospital, and Chengyang People's Hospital. Conducted requirement discussions, deepened designs, coordinated documentation, and organized briefings. Led the team to resolve design issues and delivered drawings on schedule, earning recognition from project departments and clients. - Conducted detailed design for several projects, including Weihai Wanda F3F4, Qingdao Microelectronics Park B1, Chengdu SKP Project B4, Rizhao Bus Station B1, and Qingdao Veterinary Health Center 4#. Tasks involved MEP modeling, layout design, clash resolution, construction drawing production, and briefing reports, supporting project compliance and excellence. - Responsible for company new employee training, conducting two BIM training sessions annually. Offer one-on-one training, teaching, and assessment, successfully transitioning one project staff to full-time BIM work.	

Skills

- Proficient in the full BIM process for MEP construction, including uncovering project requirements, coordinating with civil and decoration units, developing enterprise - level BIM templates, detailed pipeline design, support and hanger calculation, Fuzor walkthroughs, and briefings.
- Mastered the entire BIM process for prefabricated chiller rooms, covering family library development, chiller room deepening, and factory coordination.
- Skilled in using Lumion for rendering images and walkthrough animations, and proficient in Photoshop for image editing.

Patents and Awards

- Patent: A Pipe Support and Hanger Fixing Tool. ZL 2021 1 0214772.5
- Second-class result in 2022 Shanghai Excellent QC Group Activity in Engineering Construction.
- First Prize in the Construction Group of 2022 "Smart Bim" Competition (Chengdu SKP).
- Second Prize in the 11th BIM Competition of China Construction Eighth Engineering Bureau.
- First Prize in the 2023 Shanghai Installation Industry Technology Innovation Award.

Certificates

Languages: Mandarin Chinese (Native) | English (CET 6)
BIM Certificate: CERTIFICATE OF BIM SKILL PROFICIENCY TEST Level 1
